The School Field Day Last Week Was Good Sports

Ruth Jorgensen Won Honors of The Days Sports

Ideal weather prevailed for the School Field Day, which was held last Wednesday. The program of athletic events was carried through on schedule and was much enjoyed by the spectators.

Ruth Jorgensen won the honor of the day with Robert Peterson a close second. These two won the 100 yard race and the 200 yard race. George Goodine was first young man and Jim Mackenzie third.

In the Boys' Byesley Race David Floyd took place with Paul Moore second, and Laurie Brown third. The Girls' Byesley race was won by Doreen Cook, with Louise Fitzhenry second and Kathleen Sheehy third.

The winners of the Shield, Pony race were Jim Mackenzie first, Edward Martin second and George Hope third. In the open horse race George Goodine was first young man and Jim Mackenzie third.

After the races the draw for the fancywork made by the girls' sewing class was made. Those who purchased the lucky tickets were Mrs. Fairbairn Sr., M. Myrtle Skidmore, Mrs. L. Lewis, Mrs. P. McDermid, Mrs. E. Johnson, Miss Skidmore, Mrs. B. Hubbard, Miss Schaffner, Mrs. J. Allanach and Mrs. J. Soukup Sr.

Says Production Tax Is Now Ultra Vires

Supreme Court of Alberta Declared in Unanimous Judgement

The appellate division of the supreme court of Alberta in a unanimous judgement declared the Alberta production tax ultra vires of the Alberta legislature on the ground that it imposes indirect taxation, which is beyond the federal authority only.

Passed at the 1938 session of the Alberta legislature the act was referred to the appellate division for the test of its validity as provided in the act itself. Entitled "The Agricultural Land Relief Act," it was argued before last June.

Review Request Names Canada & Imperial V.C.s

Also Location of Graves of Deceased V.C.s

The Review would like to know the names and location of graves of Canadian V.C.s buried in Redcliff or vicinity, of V.C.s from the Imperial army who have come to Canada and died here, or of Canada V.C.s who died abroad.

We would be very grateful if anyone who would give us any of this information. It is important that we have the information as soon as possible.

That Road is Disgraceful Says The Lethbridge Herald

While we are having some improvements in the main highway from our town east a number of the last week had a trip to Medicine Hat South, and were of the opinion that the road was in terrible condition and it appeared that nothing had been done for some time to make improvements in that section.

The Lethbridge Herald had voiced complaints of the atrocious condition of this same road from Stirling to Foremost and bound to Manlybories. Surely the fine people living in Alberta's southeast country, says the Herald, are entitled to some consideration for the taxes they pay into the treasury.

Mrs. Tom Rutherford's Sister Died at Kelowna

Daughter of Mr. and Mrs. John Beattie, Formerly of Redcliff

Mrs. Tom Rutherford received bad news Saturday morning when word came from Kelowna B.C. that her sister Ruth had died suddenly following an appendix operation. Ruth was a lovely girl, nineteen years of age, and she had been here at the family lived in and near Redcliff before leaving for Tera Alberta. Sincere sympathy is felt for her parents Mr. and Mrs. John Beattie and her two sisters Mrs. Tom Rutherford and Miss Mildred of Tera.

RADIO JOTTINGS by Frank E. Fleming

"GOOD NEWS OF 1939" TO BE HEARD OVER CPAC

Starring Robert Taylor in the role of master of ceremonies, "Good News of 1939," popular program of the National Broadcasting Company, will be heard in Canada through the Canadian Broadcasting Corporation, re-broadcasting Corporation, released weekly over CPAC.

The first broadcast will be presented on Thursday, October 6, from 7 to 8 p.m. in which Florence Rice will be co-starred with Taylor in a dramatic sketch. Others on the program include Fanny (Belle Snooks) Rice, Frank Morgan and Hanley (Daddy) Stafford, Phil Ragan, as guest soloist, singing "We're in the World" to the accompaniment of Mabel Wilson's Orchestra.

Feminine Compliment: "My dear, what a perfectly stunning gown! Didn't they have it in your size?" *** Walter Winchell

SCHOOL NEWS

The students are getting in the habit of looking forward to the Literary Society and on Friday, September 23, they were not disappointed. This week's business consisted of electing a new improvement committee which includes Evelyn Kaldstad, Floa Stratton and Kathleen Sheehy.

Mr. King then presented the qualified athletes from division 1, 11 and 111 with lodges which they proudly pinned on their left sides. Special prizes are extended.

As to Ruth Jorgensen, Robert Peterson, Gordon Osgood and the two Blair brothers for their outstanding performances on Field Day.

The Literary Society read by the editor, Dolores Bleuch, was a special treat to all. Doreen Aileen Cooke played a piano duet, called Liberty Bell, the students announced a program of P.C.P.P.P. and they appreciated by an encore for which they played that beautiful song, "Star Stripes".

The last on the program was the second series of the second series of the spelling match in which grade nine students took part. The winners were Harvey Balnbridges, Kate Luno Zelds McKay and Helen Minnin.

This brought another successful meeting to a close.

Band Organized In Our Town Thursday Night

Enthusiasm Shown by Musicians At Meeting in Town Hall

At a meeting of the new Redcliff Citizens' Band held recently the following officers were elected: President—J. B. Mackenzie, Hon. Pres.—Mayor of Redcliff, Hon. Pres.—Dr. L. Lewis, Vice Pres.—W. H. Turner, Director—W. H. Turner, Asst. Director—W. Pickering, Manager—E. T. Cooke, Sec. Treasurer—F. Parsons, Librarian—H. Kitchen, Properties—J. Dutton.

The new Band has a membership of 22 players and the boys are full of pep and spirit to go. The first practice is called for Thursday Sep. 29, 1938, at 8:00 o'clock p.m.

Anyone who may have equipment belonging to the old Band is asked to return same or notify Mr. E. T. Cooke who will be pleased to secure same.

Local War Memorial Now Being Built

Mr. Rander of Medicine Hat Has Contract For The Work

Mr. Rander of Medicine Hat has been given the contract for the erection of the War Memorial near the First Avenue entrance to The Park and the work is now well underway. Much valuable voluntary assistance has been rendered by Mr. A. E. Oakland and the High School girls.

NEWSPAPER ADS BEST

Some of the largest users of radio advertising—including a full-sized automobile manufacturing company—have gone off the air.

It is significant, however, that a single large advertiser ever discontinued use of newspaper advertising. Some of them have in fact, increased their newspaper usage since the first of this year.

All forms of advertising have their uses, but many have flourished for a time and died in the years that newspaper advertising has been the mainstay of commercial publicity. People may glance at sale bills and toss them away; they may pass a billboard a dozen times and each time forget in a minute what they saw there; they may hear an announcement over the radio that appeals to them and forget all about it a moment later. But a newspaper advertisement that appeals to the reader is seldom forgotten, and if the details are an additional perusal.

Read the ads in this issue of the Review. They, too, are important news.

ECONOMICS OF ADVERTISING

Don't let anybody tell you that advertising adds to the cost of goods. Advertising reduces costs. When goods are advertised, more of them can be sold. The cost of handling a large lot of goods is not much greater than that of handling a small lot. Thus on a large and successful sale, the operating and overhead costs per article are small. But on a small and unsuccessful sale, the operating and overhead costs are large on each article.

The salespeople in a store keep drawing their pay, even if few people are coming in. The rent and other costs keep running on. Advertising provides a greater outflow of goods to divide up these costs.

Mrs. Roosevelt has been defined as Public Energy No. 1. Ex.

If a husband's words are sharp, maybe it's from trying to get some in edge-wise.

THE TOWN OF REDCLIFF

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1938, the Town of Redcliff will offer for sale, by public auction, at the Town Office, Third Street, N. E., Redcliff, Alberta, on Saturday, the 15th day of October, 1938, at 2 o'clock in the afternoon, the following parcels of land:

Lot	Block	Plan	Lot	Block	Plan
15	8	1117V	9	10	28
21, 22, 23	19	"	10	28	1117V
18, 19	21	"	11	28	"
Westerly 50 feet			12	75	755AD
throughout of lots			13	108	1117V
1, 2, 3	25	"	14	2	3024AV
The most Easterly			15 to 40		
50 feet throughout			inclusive	100	1117V
of lots 1, 2, and 3	25	"			

Each parcel will be offered for sale, subject to the approval of the Minister of Municipal Affairs, and subject to a reserve bid and to the reservations contained in the existing certificates of title. Terms, cash.

Redemption may be effected by payment of all arrears of taxes and costs, at any time prior to the sale.

Dated at Redcliff, Alberta, this 22nd day of August, 1938.

F. V. BRITT, Secretary-Treasurer

New Skating Rink for Our Own Town

Much Volunteer Work Done By Those Interested

During the past week considerable work has been done towards putting things in shape for putting up a new skating rink in town.

The new rink will be located between Third and Fourth Streets and just south of the Legion building and Obea's.

It is assured that a rink of regulation size will be laid out with sufficient space on each side to enable spectators to see the hockey games which will be played and the skating on Band nights and other times as well.

There is no doubt that the new rink will be a great improvement and that both old and young will be glad to have some sport and amusement during the winter months ahead.

The officials who have been appointed to get the rink in shape are assured that arrangements can be made for having electric lights installed which will add greatly to the enjoyment of all concerned.

The University On The Air Fall Season

Program for Thousands of People Eager for Learning

Commencing its 11th year of broadcasting activities, the University will go on the air at 7:00 o'clock on Wednesday, Sept. 28th with its opening program for the Fall season.

Behind this University program is the knowledge that thousands of people are eager to go on learning, to keep mentally alert and to widen their horizons. With intelligent choice and use, the radio program of talks, courses, drama and music should result in meeting this need. The station listened by the Extension Department shows a wide variety of topics. There will be a course this winter on International affairs, providing an opportunity to become better informed on some of the difficult questions facing us today.

Town Council Regular Meeting Monday Evening

A Number of Citizens Present At The Meeting

Town Council met last Monday evening and a number of citizens were present.

Mayor Sangster and Councillors Buchholz, Weiler, Evans, and Shaw were present.

Mr. and Mrs. A. Fitzhenry were present at the meeting in connection with taxes on their building and water rates. After stating conditions arrangements were made for satisfactory payment of taxes and water rates.

Mr. W. Bell was also at the council meeting regarding rent for his building and made an agreement for rent.

Mrs. Thos. Jones and A. T. Stratton were a delegation from I.O.O.F. asking for rent of a three lodge building instead of owing taxes. Council was of the opinion that arrangements should be made with all lodges to use having the same building instead of having expenses for improvements of the several buildings. The matter was left over until December was made.

Mr. G. Wilson was present and asked if the town water tank needed another coat of paint. The Council decided no more painting was necessary present.

Mr. Mignault, secretary of the skating rink committee asked for lumber to be used to make some improvement on the new rink. It was decided he should request for the lumber from the old swimming pool. He also asked for town assistance for plowing for the new rink and his request was granted.

Town School committee put in a request for \$800.00 for school expenses. Council moved for the amount.

Mr. Bert Van Wert requested for purchase of the building on Main St. previously owned by Mr. McNamara. Council asked for an offer on the purchase. Mr. McGlashan offered \$85.00 for the building he occupied. Council decided the offer cannot be accepted.

Finance committee approved Town accounts and motion was passed for payment.

Close to this district there were three accidents this week and three men and a woman were killed.

On man was killed on a railway train a few miles west of here. His name was Alex McMeish who was from Carlton Ont.

A young lad Richard Sidney Langdon, son of Mr. and Mrs. Langdon of Schuler fell off a grain truck and was killed.

Alex Goldie a farmer near Maple Creek and his sister Mrs. C. Butler, were in a car crossing a railway track and were struck by the train and killed instantly.

The Snow Fence Silo

Can Be Built Cheaply As A Temporary Expedient

Temporary silos constructed with snow fencing commonly employed for the protection of highways during winter, have been tested at the Experimental Farm, Brandon, for two seasons states R. M. Hopper. This type of silo is built in sections the depth of the snow fence, and each section is filled with silage before the next one is erected. The silo is circular, and may be constructed of a suitable size to accommodate the amount of feed to be stored. For efficient silage making, the silo should be twelve to sixteen feet deep. In order to make the snow fence air tight it is required to be lined with a special heavy paper known in the building trade as "stimastrat" or "bireen".

The snow fence also used at Brandon was 14 feet in diameter, and four sections, or sixteen feet high. One length of fence 50 feet long is sufficient to make a circle of this diameter and provide an overlap to permit the ends to be securely tied with wire. The paper lining was held in place during the process of filling by the use of clothes pins. After the first section was completely filled, the second section of the silo was added. The upper sections of the silo were slightly smaller in diameter than the one immediately below. This permitted the sections to telescope one into the other as the silo settled. It is essential to have the ground on which the silo is erected perfectly level so that the structure will remain upright.

The silo, fourteen feet in diameter at the ground level and about twelve feet in diameter at the top, and six feet high, held silage to the value of 30 tons of corn silage. The cost of materials for construction were \$15.50 for the fence and \$10.00 for the paper used for lining. While the snow fence can be used for a number of years, the paper can be used only once. The cost of paper is about approximately 25 cents per ton of silage stored. This cost, in addition to the annual depreciation on the fence, makes this type of silo more costly on a per-ton-storage basis than the permanent silos.

The snow fence silo affords little protection from frost unless it is well banked with straw or other material. Care must be exercised during the process of filling to prevent the paper lining from being torn and admitting air to the silage. When these precautions are taken, the quality of silage removed is quite satisfactory.

From the experience gained at Brandon, the snow fence silo is not the most economical type when considered over a period of years. As a temporary expedient it can be recommended in areas where the trench type of silo cannot be employed on account of the cost of the soil, or lack of drainage. The main use of a snow fence silo would seem to be restricted to providing extra storage space in areas where the silage crop cannot be accommodated in the regular silo. Under these conditions, the silage from the snow fence silo should be fed first in order to escape excessive freezing.

One Grand Attraction

But Lancashire Man Sometimes Missed Out On That

A Lancashire man, much against his own desire, was persuaded by his family to desert Blackpool or Douglas this year for a quieter place. Unfortunately the family went to extremes and chose a spot which apparently abhorred Luna Parks and the like and catered solely for lovers of pure tranquility. The only amenities were the sea and the air. On his return the man lodged a complaint to a full lap-room. The only amenities in "wandering" or sitting down. There were candles in the dips, candles in the pub, and everybody expected to be in bed by ten.

"But surely," a listener suggested, "there must have been some sort of amusement?"

"Aye, there were," the complainant added. "They were mending 't read and they'd one of them new concrete-mixing works. But I never there were their early that could get seen."—Manchester Guardian.

Negros Have Right Idea

Apparently there is something that can be learned from the negro race, says the Regina Leader-Post. They are not given to worrying themselves to the point of taking their own lives. They have a philosophy of life that might invite emulation. They are often jovial and rollicking. They recognize the value of a good life. When they sing they put a lot of heartiness into it.

About three million birds have been banded in North America since 1920.

The Speed Era

Motor Cars Are Now Re-making The Modern Life

It may be rather late in the day to remark that the automobile is re-making modern life. The change began a quarter of a century ago, and we are accustomed to it by now. But it is still under way.

Passenger steamship lines on inland waterways and our aircrafts are growing fewer, year by year; the branch railroad lines that led to watering places, summer resorts and remote communities are giving up the struggle one by one. The triumph of the automobile is becoming more and more complete. As it does we become more and more dependent on it.

All of which means that something entirely is going out of life. We like speed, and we are getting it in steadily increasing quantities; the only trouble is that the slower pace is becoming impossible for us. We have to use speed whether we like it or not.

We shall live through it, of course, without any trouble. Certainly we would not get back to the pre-automobile age, even if we could. But we might live a trifle more pleasantly if we could manage to save a little of the old ways of doing things. It is not altogether a good thing to rely so much on any one of our machines. We are placing ourselves more and more at the mercy of the automobile. It is a priceless servant—but it may turn out to be a rather exacting master.—Victoria Times.

Checkmate For Washington

Officers Found One Lady Not Taking Orders From Him

While reconnoitering in Westmoreland County, Virginia, General Washington's officers came upon an elderly woman of fine features being driven to the plow by an elderly negro.

"Hello, good fellow," one of the officers called out, "we must have been looking for you."

"Not paying any heed, the venerable man turned and began to plow another furrow. When he returned, the officers demanded, 'What are you doing here?' 'I am plowing for my master,' he replied. 'What is your name?' 'Bitter sea, Bitter sea, Bitter sea!'"

The officers repaired to a neat farmhouse near by and knocked upon the door, where they were greeted by an elderly woman of grave but kindly countenance. They repeated their demand.

"Upon whose orders are you acting?" demanded the lady. "Upon the orders of our chief," they replied.

"You replied," the householder exclaimed. "Who is your chief, pray?"

"General George Washington, Commander of the Revolutionary Army," one of the officers replied grandly.

"You go back," replied the lady with a smile, "and tell that General George Washington for me that his mother says, 'I am content, have her home.'"—Christian Science Monitor.

Proved A Prize Winner

Five-Cont Cat Has Won Her Second Blue Ribbon

A year ago a seven-year-old cat appeared at Louis E. Walker's hamburger stand in Vancouver with a cat clutched in his arms.

"Mister, wanna buy a cat?" he asked. After a little dicker the deal was closed with Walker handing over five cents as the purchase price. The fat, now carrying the name of Princess Han, won her second blue ribbon at the Canada Pacific exhibition there.

Boys Enjoyed The Joke

Sons Of Princess Mary Put Good One In Their Paper

Viscount Lascelles, 15, and Hon. Frederick Lascelles, 13, amateur publisher sons of the Princess Royal (Mary) and Earl of Harewood, have sought to settle "once and for all" the pronunciation of "Harewood," which, they say, is "Harwood." "In 'The Harwood News,' chronicle of village life, produced in duplicated typescript and edited jointly by the brothers, there appeared their solution of the argument with an appended account of an overheard discussion between two women in a Leeds bus.

"Well, Mrs. 'egin—they can say what they like, but I shall always call it 'arwood with the accent on the hatch."

The world's largest bell is in a Buddhist temple in Japan. It is 26 feet high and can be heard two miles away.

SPEED PILOTS WHO ENTERED IN THE U.S. NATIONAL AIR RACES

Red haired Jacqueline Cochrane not only won the eighth Bendix trophy race to triumph over 10 experienced male pilots but set a new transcontinental air record for women. Flying from Burbank, Calif., to London, N.J., in 10 hours, seven minutes and 10 seconds. Outstanding speed pilots entered in the race included, top left to right: Horace Turner, Lee Gelbach and Frank Fuller, last year's winner of the Bendix Trophy. Bottom row, left to right: Jacqueline Cochrane, winner, Art Chester and Earl Orman.

An Unusual Theatre

Building In The Heart Of Budapest

An unusual open air theatre has been completed on an island in the Danube, in the heart of Budapest.

To preserve the natural beauty of the island, the building is underground and even the orchestra is invisible. The cloakrooms are hidden by bushes and the passageways leading to the stage are masked by grassy banks and shrubbery. The auditorium which seats 2,500, is so constructed that it seems part of the natural terrain.

War-Time Substitutes

Japan's search for war-time substitutes has led to 4,000 inventions ranging from porcelain telephone to water-proof paper and buckets. Coloured paper blades and summer hats were among articles displayed at a Tokyo exhibit.

Speaking of broad-mindedness, a suspected spy arrested at London airport was found doing secret service for three foreign nations.

Luther Burbank carried on experimental work with plants for more than 50 years.

Derived From Latin Word

But Opinions Differ As To Meaning Of Pretzel

The name "pretzel," according to some who have delved into its history, comes from a Latin word meaning "a little reward". Others declare that the word has the same derivation as the word "prayer".

Pretzel once appeared in the shape of large rings to be worn about the neck before they were eaten. They were supposed to keep evil spirits away. Pretzels sometimes were hung on fruit trees with the expectation that they would help the trees to bear well. Even to-day an old superstition about pretzels survives: If one breaks a pretzel ceremoniously while he makes a wish, the wish will come true.

Easy Way To Fish

There is a fisherman in North Queensland who does not believe in baiting for the fish to "bite". He uses a bush vine with strange properties. When the vine is crushed and thrown into the rock pools, the fish float to the top in a semi-conscious condition.

Corn is grown in every state in the Union.

Scientific Finding

New Evidence That Man Lived In North America During The Ice Age

The Carnegie Institution announced its scientists had found new evidence that man lived in North America during the time of terrible volcanic activity, near the end of the last ice age.

An expedition exploring caves in southern Oregon found unmistakable evidence of human beings having lived in them during several periods of volcanic eruption. The announcement came last. Earliest occupation of these ancient homes probably was more than 10,000 years ago.

Fidelity To Home

Pigeons and Hens Do Not Easily Recognize New Quarters

The pigeon's fidelity to home is sometimes oddly expressed. For example: In the war a sudden order was received from the office known as "O.G." Pigeons were removed from London buses, they used as mobile vote-cases, from the neighborhood of Popperidge to the neighborhood of Arzac. When the pigeons were released from their new home they flew back to Popperidge and were found looting on the ground exactly where the buses had stood.

The domestic hen has a like blind fidelity to a particular plot. A poultry farmer, who was accustomed to remove his portable houses across his fields found that he had to limit the migration to a very few yards. If the houses were shifted even a few yards further than the normal, the hens quite refused to enter them, but went to roost on the exact spot from which their quarters had been removed. This was done until the houses were obvious to the most myopic vision and the meanest intelligence.

A fidelity to place, of like exactitude, has been noticed during certain experiments with bees. Though they will migrate to a transported hive, they will not always return to a home removed only a few yards from their absence.

New Broadcasting Station

Work On Transmitter Near Watrous, Sask., To Be Speeded Up

Construction of the Canadian Broadcasting Corporation's new 50,000-watt transmitter near Watrous, Sask., will be speeded up, Cladstone Murray, CBC general manager, said at Ottawa recently. The new station will cost about \$250,000, and will serve listeners in Saskatchewan. Mr. Murray said that a new plant will be worked out for the five kilowatt station at Lulu Island, near Vancouver, in order to provide better listening facilities for island British Columbians.

The present station serves part of the coast of the Fraser Valley and Vancouver Island fairly well but is not adequate for the interior, he said.

Boasting the rich life lying to turn a new horse on one man in a crowd without wetting anybody else.

What's In A Name

Every-Day Term Familiar To Some And Puzle To Others

What is a "bryeman"—or a "briem"? Many Canadians will not recognize the former as the equivalent of our terms "herdman" or "stewardman," and "briem" apparently means "flock" in good Canadian dialect.

These are a couple of the unfamiliar phrases gleaned from "The Scottish Farmer," a popular journal published in Glasgow, but they are not alone in their strangeness to most Canadian ears. From a single page of one issue of that paper a number of oddly turned phrases have been selected.

Exactly what "Cheviot cow hogg" can be remains a mystery in this particular quarter. Apparently a "dip" is some sort of horse, and "Quey" is a variety of cow—but more particular knowledge is hopelessly lacking.

"Furber farming knowledge" is a phrase that rings off-key in a country where it is taught that one is born with farming knowledge, but has to gain knowledge. "Thereby" is used to supplement our "thereabout." A "trained dog" is "Done for the hill." And a government official seeking commercial employment will be "disengaged when suited."

"Furber farming knowledge" is a phrase that rings off-key in a country where it is taught that one is born with farming knowledge, but has to gain knowledge. "Thereby" is used to supplement our "thereabout." A "trained dog" is "Done for the hill." And a government official seeking commercial employment will be "disengaged when suited."

Many city folk understand but few of the every-day terms used on the farm. To them a calf is simply a "little cow," an equine of any age, size or sex is a "horse," and grain any variety is "barley" and don't quit them about the meanings of such mysterious words as "wif," "fodder" and "feed" and vocabulary replies would probably be "a sort of pig" and "a deceased fur-bearing animal."

But wait a minute. Those same city people have their own every-day language of which are Greek to the farmer. Let's try a few newspaper terms. "Deadline" and "lay-out" do not necessarily have anything to do with news funerals or knockouts. No, the farmer is not familiar with newspaper phraseology—nor is the city clerk acquainted with the druggist's language.

The English language? Actually, it does not exist as a universal medium of conversation for English-speaking peoples. Every walk of life, every locality has its own special terms, arising from a specialized environment or unusual local conditions. Each person has his own individuality of language and has his own appearance and his own voice. But dump all of these things—add a little salt, stir in all the ingredients are thoroughly mixed and decant slowly—the complex solution which results is the language that divides the globe.

Had Weakness For Thistles

Scottish Emblem Was Used Loathly In Illinois Home

Because the late James A. (Wheat King) Patton liked Scotch thistles, successors were dubious about the success of the sale of furnishings in his mansion at Evanston, Ill.—Nine marble and mahogany fireplaces are carved in a thistle pattern, the hands of a specially made grandfather's clock are cut out like thistles, and a thistle design predominates the window. The flooring, light flutings, wall paper and table legs also carry the thistle motif.

Had Travelled Far

A postcard dated Los Angeles, California, December, 1927, and addressed to a party in London, Ont., has finally arrived after 11 years of wandering throughout the world. Its rest resting place before arriving in London was Canton, China.—Chicago Tribune.

Prefered A Bicycle

Rachel Colvin, a nurse of Kilmegon, Dumfrieshire, Scotland, has cycled 75,000 miles in 23 years of ministering to the sick in her community. She has also been known to have an automobile for her work but she says: "I prefer my bicycle."

Bats do not fly at high altitudes, as do birds. They fly between 10 and 30 feet above the ground, the level occupied by most of the night-flying insects.

Bats are hunted for food in Africa.

TOWN OF REDCLIFF**The Local Tax Arrears
Consolidation Act**

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be operative to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing.

All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act:—

Any person, firm or corporation who is the owner of any parcel of lands in the Town of Redcliff, against the title of which there is subsisting notification for arrears under "The Tax Recovery Act 1929 and 1938"

Any person who has been a town rate resident of the Town of Redcliff for 12 months immediately preceding the date of his application in the case of lands which have been finally acquired by the Town of Redcliff but not sold or such person's representative.

In such cases where the applicant's property is to be exposed for sale at the forthcoming Tax Sale on Oct. 15th, 1938, such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the application, the Secretary/Treasurer shall calculate the amount required to pay the arrears of taxes, if the same were consolidated, and the applicant shall deposit with the Secretary/Treasurer one fifth of such sum.

In such cases where the application to consolidate is made after the 15th day of November 1938 the applicant shall also deposit with the Secretary/Treasurer sufficient to pay the current year's taxes.

In any event the current year's taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted, the deposit shall be applied on the applicant's consolidated arrears, otherwise it shall be repaid to him.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs.

No buildings, fences, fixtures or other improvements shall be removed from any land in respect to which there is a subsisting tax consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1929 and 1938 are suspended in respect to the properties involved while such consolidation agreement is in force.

Last Link in The Western Section Of Trans-Canada Highway Near Completion

The last link in the Trans-Canada Highway between Winnipeg and the Pacific coast, will be forged with the completion of the final stretch of the "Big Bend" highway, which is being built around the great northern bend of the Columbia River between the towns of Golden and Revelstoke, British Columbia. Only 15 miles of the 100-mile highway remains to be constructed, and efforts are being made to have the road open to traffic in 1930. At present a daily railway automobile transport service in each direction between Golden and Revelstoke, enables motorists to bridge the unfinished gap. Reports received so far this year indicate that the all-Canadian route from the prairies to the Pacific is particularly popular with visiting motorists.

The "Big Bend" highway passes through a magnificent mountain region, within sight of snowfields, glaciers and the other charms of the only alpine world in the country. The part of the way the road skirts the Columbia River, affording splendid views of the mountains and the mountains and of the giant peaks which form part of the main divide of the Rockies. About 40 miles south of Donald, British Columbia, the road passes through one of the finest areas of virgin timber in the country. Here giant cedar trees, having butts from six to ten feet in diameter, rise high above the sides of the road, along with fine specimens of Douglasian spruce which reach a height of 150 feet. Stately fir trees from three to four feet in diameter are also found in scattered groves.

The completion of the "Big Bend" highway will provide a direct link between Canadian routes from Shreiner, about 125 miles east of the town of Fort Arthur, and the Pacific coast in Western Ontario, and the Prairie Provinces to the Pacific coast, and will make possible the development of tourist and commercial motor travel through the mountains of Western Canada. The new, uncompleted section of the Trans-Canada Highway which will ultimately extend from Halifax, Nova Scotia, to Vancouver, British Columbia, a distance of approximately 5,000 miles, is that in north-western Ontario.

Rare Tropical Fish

Have Been Secured For Philadelphia Aquarium By Director

Brought back by Dr. Robert O. Van Dusen, Director of the Philadelphia Aquarium, nearly 1,500 tropical fish are displaying their rare colors and shapes to the public there.

Between 60 and 80 species are represented in the addition to the Gulf of Mexico, Dr. Van Dusen said. He was particularly proud of a handsome fish, the red and blue striped surgeonfish, which he brought back by the Philadelphia aquarium, and considered very rare.

Other spectacular additions are two Queen Angles, so-called because their markings appear like a crown of blue on their heads; a large orange triggerfish, "built like a submarine"; Spanish and red hogfish and yellow and black perch.

Largely all of the collection is a nurse shark, equipped with a mouth like a sucker instead of the usual elliptical rows of sharp teeth. Two feet long, it dwells the inch-long Nurse Grigories and sergeant majors flanking about the tanks.

Another big specimen is a 20-pound black grouper, dying for a while with tropical porcupine fish, and many others.

A Mailer Of Opinions

Two friends met in the street. One of them had his arm broken in a motor accident, and was carrying it in a sling.

"Say," asked the first, "it's too bad about your arm, but what are you going to carry it in a sling?"

The injured man shrugged. "There's a slight difference of opinion about that," he replied. "My doctor says two weeks—and my lawyer says twelve!"

Requid For Klondike

A Chester, N. Y., woman who played the good Samaritan last spring and befriended a tramp that knocked at her back door, asking for coal, has received a handsome reward for her trouble. A letter from a sister of the wanderer, told her that the tramp, who had been a member of a gang of thieves, had been arrested and was now in jail. She also would "hear further" shortly afterwards a cheque for \$3,000 arrived.

Sixty-three varieties of time are being used in different countries, daylight saving time being included in the list.

Remarks Misunderstood

When Conductor Explains His State of Mind to His Pupils

Prof. Fyatt, Director of the Welsh Imperial Singer, who were fulfilling an engagement in Toronto, said he remains surprised recently about Canadian music teachers were "unfortunately twisted."

"I can assure you I was casting no reflection on the many indolent, yet excellent music teachers in Toronto when I spoke of good voices being spoiled by bad teaching," he said.

"It was lamenting the fact that so many pupils with good voices spoiled their voices by going to the wrong teachers."

"There are teachers in Canada as good as those anywhere in the world. In fact, they are probably better because they are better paid and more numerous. But they are not so good as those in the United States, at the same time, there are hundreds of good teachers in the United States because they are not receiving compensating training."

Charcoal From Wood Waste

Plan To Utilize Large Quantities Of Wood Waste In Canada

Among the many questions that engage the attention of the Department of Mines and Resources is the utilization of the large quantities of wood waste that occur in lumbering operations in Canada. The waste is now mostly burned, but the waste would help to solve this problem, if a local market could be found. The waste is now mostly burned, but the waste would help to solve this problem, if a local market could be found. The waste is now mostly burned, but the waste would help to solve this problem, if a local market could be found.

In Europe specialists are being made to use products from charcoal as a fuel for heavy trucks. Such a fuel is considerably cheaper than gasoline, and, if adopted, it would increase the demand for charcoal.

When wood is heated in the absence of air it decomposes, evolving gases, and leaves as a residue, charcoal. The earliest known method of making charcoal was by placing dry wood in a shallow pit and covering it with straw. The straw was then set on fire, and the heat of the fire, which was regulated by the amount of straw, produced charcoal. This method is still used to some extent, but in modern distillation plants charcoal is produced by placing dry wood in steel vessels which are heated externally. The gases evolved, after passing through condensers, are further processed, yielding valuable by-products, acetic acid and methyl alcohol.

Seize Narcotics

U.S. Customs Seize Shipments Valued At \$67,000

Buried deep in the coal bunkers of the Philippine steamship Don Jose, United States customs agents discovered a shipment of narcotics valued at approximately \$67,000. The seizure was the second largest made in 40 years here. Customs Collector Fred Pick said. Largest was made July 28 when the motorship Bona was seized at Atlantic crossing record.

"I hear you are going to be married, old man! I hope you'll be very happy."

"Well, I don't see why I should not. I came through this all right."

Treated Fence Posts For Pathogens

Popular Posts, Dipped In Bluestone Are Used

In the 1928 development of 24,000 acres of community pasture in Saskatchewan under the Prairie Farm Rehabilitation Act program, 1,300 fence posts were required for the huge undertaking. All purchases of material for fence construction is made through the government, and the posts are treated with bluestone to protect them from decay. An interesting feature is the use of bluestone-treated popular posts, as exemplified by the Dominion Experimental Station at Saskatoon in their experiments over the past 15 years. During that time the bluestone treatment has proved very satisfactory in preventing decay. The use of these posts in the community pasture may prove to be a forerunner of a market for some of the good northern Saskatchewan timber.

March 30, 1928, posts were delivered at the shipping point and after delivery at the shipping point were treated in May and June under an experimental treatment with copper sulphate (bluestone).

The method of treatment consisted of peeling the bark of the post three to four feet and one strip of bark completely up the post. The post was then placed in the country position on its butt in a wooden tank which contained about 12 inches of a saturated solution of copper sulphate. The posts absorbed from one to two quarts of the solution, the colour of the bluestone showing at the top when the treatment is complete. The posts are then set aside to dry and can either be completely peeled or left to the weather. The posts last longer if peeled immediately after treatment. The time necessary to complete the treatment depends upon the weather. On hot days the solution will follow the sap to the top of the post in three to four days it may take 12 hours longer.

The size of the popular posts used in the community pastures are 3-inch top, 7 feet long; corner-post 3-inch top, 8 feet long. Standard community pastures have barbed wire strands with posts one red post. Reserve areas and irrigation canals are fenced with three red strands of barbed wire with posts also one red post.

Federation Of West Indies

Plan Is Formulated With Object Of Ultimate Status Of A Dominion

A federation of the West Indies with the ultimate status of a Dominion was envisioned by E. W. Youngman, Jamaica delegate to the West Indies Chamber of Commerce meeting at Trinidad. He was speaking on a resolution which urged establishment of better contact with the outside world. The resolution also urged that a senior colonial officer should pay periodic visits to the colonies, carried unanimously.

Business From Denmark

A number of banana trees have been planted in Juliland and the first harvest has brought record prices in Denmark. Trees which were imported from Jamaica attained a height of 24 feet and the fruit is reported an excellent quality.

A ton of sugar cane yields about 100 pounds of raw sugar and three gallons of rum.

Two Triangles Form Rich Design

Two single triangles make a rich design when joined form a variety of luxurious accessories. The medallions—they're all jewelry—are simple and chic and are lovely made of string. For such smaller accessories as neckties, handkerchiefs, or a pair of cufflinks, the medallions show; illustrations of them and of stitches; materials used.

To obtain this pattern send 20 cents in coin (stamp cannot be accepted) to Household Arts Dept., Wausau, Wisconsin, 54980.

There is no Alice Brooks pattern book published.

Growers Disappointed

First Crop Of Jan Jan Tomatoes Was A Failure

The Jan Jan tomato has late Canadian growers down with a thump. Developed by Jenksy and Rumble of Torbay, this tomato seemed to be the answer to the grower's prayer for a fruit that would enable this country to compete on the British market with Italian and Spanish tomatoes.

But instead of growing true to form, the crop was a failure. The well-rounded product which could be neatly sliced in Britain, the Jan Jan now turned out to be like any other Canadian tomato—good eating, but not able to keep its shape when taken from a can.

It is a mystery that has caused grey hairs among the growers and the officials of the Federal Ministry of Agriculture. And the only conclusion they can come to is that the seed was not "bred," which means the seed was still in the experimental stage.

The seeds were planted after disaster, and the crop was a failure. The well-rounded product which could be neatly sliced in Britain, the Jan Jan now turned out to be like any other Canadian tomato—good eating, but not able to keep its shape when taken from a can.

But something went wrong. Jan Jan seeds were planted, but the tomatoes were not as good as the ones that were planted before. The tomatoes were not as good as the ones that were planted before. The tomatoes were not as good as the ones that were planted before.

Some ideas Not Practical

Many Good Ones Would Cost Too Much To Develop

"Are you going to put on the market your ice cream in cylinder shape? I asked a manufacturer of ice cream, J. C. Kirkwood, in Marketing. "We have not yet decided to do so," was the answer. "The machine required to make this shape would cost \$10,000, and we don't know yet whether this new shape is going to be popular."

Lots of good ideas don't last. The "advertising" camera, once widely advertised, was not the winning idea. The "advertising" camera, once widely advertised, was not the winning idea. The "advertising" camera, once widely advertised, was not the winning idea.

For years, states Ned O'Hara, in the New York City, a pig farmer combed through the city's garbage that was dumped at the New York City, a pig farmer combed through the city's garbage that was dumped at the New York City, a pig farmer combed through the city's garbage that was dumped at the New York City.

Doctor "Your recovery is largely due to your own powers of resistance."

Said: "Then you will be charging me your full fee?"

Says U. S. Could Settle Labor Disputes As Easily As They Do In Britain

Aims To Please Guests

Manager Of Large Hotels Always Looking For New Ways

A man who began life as a dishwasher, strolled into one of London's luxury hotels. While occupying a suite of the kind usually reserved for millionaires, he will study what he calls the "set up" of that hotel.

The man is Ralph Hitz, of New York, manager of nine of the largest hotels in the United States.

Swathly, heavily built Mr. Hitz gave the "set up" of these hotels when seen at the Savoy (write a London Sunday Express reporter).

Visitors arriving at a fifth-man hotel and hotel sign the register, little realizing that the clerk behind the desk has been trained to read up on the hotel's set up.

Mr. Hitz said that this text was just one of 2,000 "set ups" at his hotels.

Page-boys at his hotels are expected to be able to answer the visitor's question as to the hotel's set up.

If there are children they are sure of free toys at a Hitz establishment. Guests are invited to furnish particulars of their birth, ostensibly to enable the manager to grant credit, but actually the information is used to enable the manager to be stalked through life with birthday greetings.

Hitz is particularly proud of his "Overnight Packages." This contains night attire and toilet accessories, but the manager's guests whose luggage has been lost.

These outfits are sent without charge, but the manager's guests who have no razor is included. A man once said a Hitz hotel after cutting him.

Patronize one of his hotels for five years and you become a Charter Customer, entitled to 25¢ a day credit. Super customers of good standing receive a Gold Card entitling them to unlimited credit.

One Essential Fact

Children Should Be Taught Honestly Is The One Reward

Two Port Erie children, 14 and 10 years old, have been named as the richest children in their town. A Buffalo man had been robbed of a pocketbook containing \$20 and a key case containing \$200. The thief kept the \$20, but, considering the key case was worthless, he threw it away. The children found the key case containing the money and value of the pocketbook.

The children's mother, the Chief of Police who returned it to the rightful owner. The Buffalo man reports the children's reward as \$100.

The children deserve credit for their honesty. The children's mother, the Chief of Police who returned it to the rightful owner. The Buffalo man reports the children's reward as \$100.

President Roosevelt said that he hoped the United States could work toward the settlement of labor disputes in Great Britain with a minimum of strike and life-taking.

He made the assertion at his press conference in reply to a question as to how a report of a special commission on British employer-employee relations might be applied to proposed legislation in the United States.

Mr. Roosevelt said that in working out a law nothing could be accomplished by calling names and emphasizing violence of disputes. He added that he hoped employer-employee cooperation in the United States over a period of years would give Americans the same attitude toward labor problems as prevails in Great Britain.

The special commission told the President that British industry and labor relations, including the law, through mutual confidence and cooperation.

John J. Watt, American Federation of Labor representative on the commission, said in a statement that the United States could not "hope to translate the practice relating to collective bargaining in British into American conditions."

Watt gave as a cause for the difficulty to hitch a pair of horses to pull a truck.

He said that the United States was in the "horse and buggy stage as far as labor relations are concerned," Watt gave as a cause for the difficulty to hitch a pair of horses to pull a truck.

Miss Maple Brownlee, of Cal-
gary, arrived on Friday to visit
with Mr. and Mrs. C. Barr.

Mr. J. R. MacKenzie is having
extensive alterations made in his
house on Fifth Street.

Mr. W. H. Thomson, of Dominion
Glass Co. Office staff, returned
to work Monday morning after a
two weeks vacation.

"Did you hear about the little
girl who asked Will for some
rock eyed salmon?"

Mr. Clash, who has had a ge-
ometry store in Medicine Hat for
some time, has been appointed
hallman of the Presbyterian
kindly board. Mrs. Clash is man-
aging the store in her husband's
absence.

He plays a fair game of golf -
you watch him.

AN EDITOR'S PRAYER

Blessed are the merchants who
advertise, for they have faith in
their business, and their prosper-
ity shall increase many fold.
Blessed is the woman who sends
in a written account of a party or
a wedding, for she shall see the
details and names of her guests
correctly reported. Blessed are
those who do not expect the editor
to know everything, but who tell
him whenever an interesting
event occurs in which they are
interested, for they shall have a
better newspaper in their town.
Blessed are they who get their
copy in early, for they shall hold
a warm place in the editor's heart.
Blessed are they who co-operate
with the editor in his efforts in
behalf of the community, for
their town shall be known to all
men, far and wide, as a good place
in which to live and do business.
Blessed are they who do not
think they could run the paper
better than the editor runs it -
yes, thrice blessed are they,
because there are so few of them
in the community. - Ex.

Ont. is at present visiting at the
home of Mr. and Mrs. R. Thacker.
Mrs. Thacker entertained inform-
ally for her sister-in-law on Wed-
nesday evening so that she might
meet many of her friends.

SEPTEMBER

What is so new as a day in
September?
These days and this month,
we can never forget -
The sunshine so golden
The air - Oh, so balmy
The beauty of summer remains
with us yet.

Except when we read of
the doings of Hitler
That crazy man, with
the silly mustache -
Who would blot out the
sunshine
And poison the breezes
Till our joy in the autumn
has gone all to smash.
